

Neuropilin-1 Rabbit mAb[FOC2]

Cat NO. :A23275

Information:

Applications	Reactivity:	UniProt ID:	MW(kDa)	Host	Isotype	Size
WB,IHC,ICC/IF	H,M,R	O14786	120	Rabbit	lgG	100ul,200ul

Applications detail:

Application	Dilution			
WB	1:1000-2000			
ІНС	1:100			
ICC/IF	1:100			
The optimal dilutions should be determined by the end user				

Conjugate:

UnConjugate

Form:

Liquid

sensitivity:

Endogenous

Purification:

Protein A purification

Specificity:

Antibody is produced by immunizing animals with a synthetic peptide at the sequence of human Neuropilin-1.

Storage buffer and conditions:

Antibody store in 10 mM PBS, 0.5mg/ml BSA, 50% glycerol (buffer) .

Shipped at 4°C. Store at-20°C or -80°C.

 $\label{products} \textbf{Products are valid for one natural year of receipt.} \textbf{Avoid repeated freeze} \ \textit{I} \ \textbf{thaw cycles}.$

Tissue specificity:

[Isoform 1]: The expression of isoforms 1 and 2 does not seem to overlap. Expressed by the blood vessels of different tissues. In the developing embryo it is found predominantly in the nervous

Subcellular location:

[Isoform 2]: Secreted.,Mitochondrion membrane,Single-pass type I membrane protein. Cell membrane,Single-pass type I membrane protein. Cytoplasm.

Function:

Introduction: WB: Western Blot IP: Immunoprecipitation IHC: Immunohistochemistry ChIP: Chromatin Immunoprecipitation ICC/IF: Immunocytochemistry/
Immunofluorescence F: Flow Cytometry

Cross Reactivity: H: human M: mouse R: rat Hm: hamster Mk: monkey Vir: virus MI: mink C: chicken Dm D. melanogaster X: Xenopus Z: zebrafish B: bovine Dg: dog Pg: pig Hr: horse

Cell-surface receptor involved in the development of the cardiovascular system, in angiogenesis, in the formation of certain neuronal circuits and in organogenesis outside the nervous system. Mediates the chemorepulsant activity of semaphorins (PubMed:9288753, PubMed:9529250, PubMed:10688880). Recognizes a C-end rule (CendR) motif R/KXXR/K on its ligands which causes cellular internalization and vascular leakage (PubMed:19805273). It binds to semaphorin 3A, the PLGF-2 isoform of PGF, the VEGF165 isoform of VEGFA and $\textbf{VEGFB} \ (\textbf{PubMed:} 9288753, \textbf{PubMed:} 9529250, \textbf{PubMed:} 10688880, \textbf{PubMed:} 19805273). \ Coexpression \ with \ \textbf{KDR} \\ \textbf{VEGFB} \ (\textbf{PubMed:} 9288753, \textbf{PubMed:} 9529250, \textbf{PubMed:} 10688880, \textbf{PubMed:} 19805273). \\ \textbf{Coexpression} \ \textbf{with} \ \textbf{KDR} \\ \textbf{VEGFB} \ (\textbf{PubMed:} 9288753, \textbf{PubMed:} 9529250, \textbf{PubMed:} 10688880, \textbf{PubMed:} 19805273). \\ \textbf{Coexpression} \ \textbf{with} \ \textbf{KDR} \\ \textbf{VEGFB} \ (\textbf{PubMed:} 9288753, \textbf{PubMed:} 9529250, \textbf{PubMed:} 10688880, \textbf{PubMed:} 19805273). \\ \textbf{Coexpression} \ \textbf{With} \ \textbf{VEGFB} \ \textbf{VEG$ results in increased VEGF165 binding to KDR as well as increased chemotaxis. Regulates VEGF-induced angiogenesis. Binding to VEGFA initiates a signaling pathway needed for motor neuron axon guidance and cell body migration, including for the caudal migration of facial motor neurons from rhombomere 4 to rhombomere 6 during embryonic development (By similarity). Regulates mitochondrial iron transport via interaction with ABCB8/MITOSUR (PubMed:30623799).., [Isoform 2]: Binds VEGF-165 and may inhibit its binding to cells (PubMed:10748121, PubMed:26503042). May induce apoptosis by sequestering VEGF-165 (PubMed:10748121). May bind as well various members of the semaphorin family. Its expression has an averse effect on blood vessel number and integrity.., (Microbial infection) Acts as a host factor for human coronavirus SARS-CoV-2 infection. Recognizes and binds to CendR motif RRAR on SARS-CoV-2 spike protein S1 which enhances SARS-CoV-2 infection..

Validation Data:

Neuropilin-1 Rabbit mAb[FOC2] Images

Western blot (SDS PAGE) analysis of extracts from human liver tissue lysate lysates.Using Neuropilin-1 Rabbit mAb lgG [FOC2] at dilution of 1:1000 incubated at
