Tissue specificity:

Subcellular location:

Cytoplasm.

Function:

Binds alpha-tocopherol, enhances its transfer between separate membranes, and stimulates its release from liver cells (PubMed:7887897). Binds both phosphatidylinositol 3,4-bisphosphate and phosphatidylinositol 4,5-bisphosphate,the resulting conformation change is important for the release of the bound alpha-tocopherol (By similarity)..
